POST

20% More State Data

October 13, 2021

… and adding Illionois

It’s a fact!

---“EnviroAI presents more state data than states present state data.”- Jed Anderson, CEO, EnviroAI

Three distinct advantages:

1. MORE DATA.

EnviroAI presents more state data than states themselves present state environmental data (we obtain additional data through public information act requests] [ex. we present 20% more data than the State of Texas]

2. SMARTER DATA.

EnviroAI uses advanced artificial intelligence to make state data even more useful, insightful, and accessible to customers.

3. FASTER DATA.

EnviroAI employs advanced information search and retrieval systems focusing specifically on information transfer speed (i.e. “time is money”)

---“As I view the world of increasing information, the more environmental information we can get people and their computers, and the faster and more useful we can make that information using artificial intelligence, the better people and their computers can learn how to protect the environment and make more money.”- Jed Anderson, EnviroAI
