POST

A magical night tonight . . .

December 24, 2022

a magical night tonight … .

. .

The universe is magical. And where there is magic … there must be a magician.

The universe is computing. I wouldn't get caught up in thinking of it as a "computer-computer". It's not a matter-based computer like the one we are typing on … but it is computing. We now know this … especially with the work that's been done over the last 5-10 years. And this moment captured in the depiction above in my opinion was … the greatest "key stroke" ever.

God apparently deciding to enter the "computer program" Himself.

---"If it looks like a duck, swims like a duck, and quacks like a duck … then its … not necessarily a duck … but the odds have gone up considerably it also likes crackers." - Jed Anderson, EnviroAI

Even if the Universe is not a computer, or simulation … the mathematical, computational, and informational underpinnings make you scratch your head sometimes and wonder why this thing is acting like a duck.

I think this is fun to thing about. I don't know if its right. It's just fun to think about. Imagine if God chose to run a computer "program" or "simulation" to test whatever variable God wanted to test. Then, part way through the simulation or program, God starts thinking … geeze … these creatures that have resulted from my program are wonderful and I love them, but they just aren't fully getting it. They seem to be burdened by their errors (sins). Why don't I send a helper, my Son, into the "program" to remove the weight of their errors (sins). Give them a fresh start that they can continue to draw upon. Remind them of who they are, that they are loved by me, and that they are eternal and divine.

PEACE & JOY & LOVE

TO YOU TONIGHT ON THIS SPECIAL NIGHT IN THIS MAGICAL UNIVERSE

God I believe is now with you.
