POST

An intelligence beyond human beings

Originally written: May 31, 2025 · Published here: May 13, 2026

An intelligence beyond human beings … but not ARTIFICIAL. Read the following detailed analyses from Grok, OpenAI, Gemini and Claude about the merits of this historic new approach to pursuing an even more generalized potential form of intelligence … Environmental General Intelligence or EGI. EGI includes human intelligence, since of course humans are in nature, but also potential forms of nonanthropogenic intelligence that may be found in nature. Of paramount interest, EGI also holds promise in better aligning with nature's interests and protecting nature than AGI—which in itself is a critical reason for pursuing EGI.

Please help EnviroAI in our mission to continue building and creating EGI. Contact us at info@enviro.ai. www.enviro.ai (http://www.enviro.ai)
