POST

Automated Environmental Professional Work

September 26, 2021

Faster. Cheaper. Better.

Tired of routine intellectual tasks?

“Environmental professionals will love the future that is quickly appearing …

Less forms.

Less paperwork.

Less boxes to check.

More intellectual fun.” - Jed Anderson, CEO, EnviroAI

“I predict that, because of artificial intelligence and its ability to automate certain tasks that in the past were impossible to automate, not only will we have a much wealthier civilization, but the quality of work will go up very significantly and a higher fraction of people will have callings and careers relative to today.” - Jeff Bezos

Analysis

What can’t EnviroAI automate?

---“We are not finding any environmental task now that we cannot largely automate.”

---“The pace of technological progress right now is not just exponential … it’s downright dizzying.”

- Jed Anderson, CEO, EnviroAI
