POST

Bezos, Musk, and Anderson

December 2, 2020

Who is the least crazy?

Bezos, Musk …

… my vision and implementation is the least crazy

Most companies when I first tell them about our project to remove pollution from their facilities in the Houston Ship Channel area look at me like I'm completely nuts.

I'm not trying to go to Mars.

I'm not trying to put heavy-industry into space.

I'm just piping pollution to a central facility and treating it. Not only is it not impossible … it's not even that difficult.

---"Impossible is just a word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. Impossible is not a fact. It's an opinion. Impossible is potential. Impossible is temporary. Impossible is nothing." - Muhammad Ali
