Bloomberg: "New satellite just found a giant methane leak

February 12, 2021

Remote sensing . . .artificial intelligence … “environmental protection getting very transparent”

---“People’s jaws drop …

when they see what EnviroAI can do with its automated drones, satellite access, open-path FTIR, and optical gas imaging systems that are connected to machine learning. It’s the only system like this in the world. Power. Power. Power.”

Every molecule of pollution …

Measured.

Monitored.

Managed.

… in real-time.

That’s the future. That’s EnviroAI. That future is becoming today.
