Distance Limits

September 9, 2021

Using AI and Satellites---“Keeping the Public Safe”

DISTANCE

LIMIT?

WE KNOW THEM ALL

INSTANTLY.

1. EnviroAI uses Natural Language Processing (NLP) to identify all facilities with distance limitations in permits and permits-by-rule (and facilities that potentially should have distance limits).
2. EnviroAI then uses NLP to identify the particular distance limit for that authorization (which can vary significantly—ex/ 106.262 and individual permit representations).
3. EnviroAI finally uses satellite images, aerials, and vision AI to determine what structures of potential concern exist within those distance limits (see analysis below).

IS THE PUBLIC SAFE?

IS A FACILITY IN COMPLIANCE?

AERIAL TIME-LAPSE ANALYSIS

SATELLITE TIME-LAPSE ANALYSIS
