Schedule private demo today.

Our drone application is fully autonomous (http://r20.rs6.net/tn.jsp?f=001Ef-XqhLVGO2C2-QPRUVgvvCuozeGoLS8qRXCQ-yndXo29v0yxwsiul_Wnc-kMYGfP0OU7zke5yYePMvfHVcnz3VAXXfXuY_ISDHRdXdaRo10-UuocK3wZ66P5lx6l9AuWLMHMn6JPbkrO-LC9sC8J3zOP4edQfyl&c=&ch=). An alarm occurs and the drone can be automatically dispatched from its robotic base. An EHS manager can also dispatch or schedule the drone around an inspection, a unit coming online, or any daily activity. The drone can also automatically switch instrument payloads depending on the remote-sensing need (i.e.flying separate sorties from the robotic base). Data is processed with the assistance of artificial intelligence and can be delivered to the user with regulatory and health-based insights.
