Earth First

March 9, 2021

A documentary about EnviroAI's efforts to build a machine to end pollution

---"A story of redemption"

"Early human technology hurt earth.

Advanced human technology now might save earth in the first place.

It's parody on a planetary scale.

A planetary plot twist.

Human and terrestrial history being re-written into the most beautiful of novels.

Humans save earth.

Redemptive.

Transformative.

Transcendent."

- Jed Anderson, Creator, EnviroAI

---"The more I study artificial intelligence, quantum physics, and the trajectory of technological innovation in the environmental sciences … the more I get a vision that humans will become the reason earth survives for as long as she will. It's

incredibly ironic that humans started out hurting earth through innovation, and now this innovation is evolving to be the reason she will survive for as long as she will in the first place. Paradoxical. Redemptive. Transcendent."

- Jed Anderson, Creator, EnviroAI
