POST

EHS Professional's Quote on AI . . .

February 7, 2020

----“Artificial intelligence is mostly hype.”

EHS Professional----“Artificial intelligence is mostly hype.”

Most EHS professionals I talk with say that artificial intelligence is mostly hype and won’t help them. Furthermore, they don’t want any help from it.

This EHS position seems to be in direct contrast with what most other industry and business professionals I talk with say—along with world and business leaders.

It’s odd why the environmental profession seems so opposed to using AI technology. I’m trying to push people as hard as I can to advance themselves. Millions of dollars in opportunity literally is already at their fingertips.

----“Artificial intelligence is the future, not only of Russia, but of all of mankind. Whoever becomes the leader in this sphere will become the ruler of the world.” ---Vladimir Putin

----“Artificial intelligence will increase world economic growth by $15.7 trillion by 2030.”---Price Waterhouse Coopers

---“AI will increase economic growth by $13 trillion by 2030.”---McKinsey

INTELLIGENCE.DATA. POWER. SPEED
