Energy Imbalance Problem"---Climate change is just a symptom of the larger problem

Latest NASA/NOAA Study---Earth's Energy Imbalance Doubled Since 2005

Climate Change is just a Symptom of the Larger Problem

---"Some people have trouble understanding climate change. No one has trouble understanding energy balance. It's 4th grade science. When systems have more energy in them they do more stuff. More stuff happens in them." - Jed Anderson, Creator, EnviroAI

New NASA/NOAA Study

Energy Imbalance Problem

The bigger picture problem is an energy imbalance problem (https://r20.rs6.net/tn.jsp?f=001WKEWkzUaiYoah9X9VgdhoJ0yE-ZagH7gCFyKcpHYz802eYsvggWl93JjOpkM4iQlAvGnsWDYs9dpkY_su6lF3W6bgrgPW87EBp1PkjTih4HCjxLK3w2yn0M0hEHPfIRDW9au6r1394suRzUFTBgBR04BnmpEffF9PScBCCNa0XfDtdg1SJOe5-TyaH1uKXyXzTGzdOqq42OY02r5a9nNyrseHw8FQY2C4euxv8vLXFwPO3-UAplOQq3Mz2WYmRHH&c=&ch=). The earth's energy imbalance has doubled in the last 15 years. I look at this more than I look at temperature or CO2 levels. In essence the problem is an energy problem. What am I doing to help?

We're attempting to build a real-time Digital Twin of Earth usingQuantum Computing & Artificial Intelligence
