Environmental Object Detection?

October 19, 2020

How do we do it?

---“Similar to an MRI machine using AI object detection to look for anomalies in your body … EnviroAI is using satellite, drone, and other imagery with AI object detection to look for anomalies in the environment.”

– Jed Anderson, Creator, EnviroAI

How does EnviroAI recognize environmental anomalies and objects?

… just like AI is being trained to recognize cancer and other anomalies or objects. We use machine learning and a deep learning convolutional neural network to train AI to recognize pollution and other environmental objects (smoke, sheens, nonexistent or improper control equipment, etc.)
