POST

Go to any chemical plant . . .

March 24, 2022

… without even walking through the fence. Handy tool for environmental professionals and others.

“Handy” tor environmental professionals and others …

Go to your customer’s facility … (in TX, LA, and soon other states)

… without even walking through the fence .

No gates to walk through.

No security videos to watch.

Less safety and operational concerns for the company than a physical visit.

Thanks to exponentially advancing technology … much more work can be done remotely and virtually!

Safer.

Less expensive. (ex./ paying you to drive there and then accompanying you through the facility if you are a paid consultant or contractor doing more off-site related work)

Often Much Faster … way to get certain information and get work done.

- Permit Levels
- Pollution Levels
- Equipment Details
- Operating Parameters
- Control Efforts
- Related Agency Documents
- Related Internet Results
- Upsets, Deviations & Corrective Actions

Handy for …

- Audits
- Permit Preparation
- Pre-Site Visits
- Site Inspections
- Compliance Assistance
- Compliance Monitoring

… and many many more use-cases.

EnviroAI users can even create a “TrackBot” to monitor agency decisions for that particular piece of equipment or related equipment.
