Haiti . . . and EnviroAI

October 5, 2021

Why is EnviroAI developing a “machine” to protect humanity and nature?

---“As always, there’s good news and there’s bad news. The bad news is, we seem incapable of solving our more pressing or persistent problems. The good news is, we’re getting closer to building a machine that might do it for us.”—Jim Vibert

Why is EnviroAI building technology to protect humanity and the environment?

Interspersed in the environmental automation products below are the images why.

ENVIROVERSE

… building the environmental metaverse for environmental interaction and collaboration.

—“The more we automate mundane environmental compliance and protection tasks, the more we can free-up talented human minds and financial resources to solve the more intractable problems.”

- Jed Anderson, EnviroAI
