Here’s an assessment of our AI company’s mission and progress in building toward “Environmental Super-Intelligence”. We are approximately 9% complete. Only about 91% to go!!!!!!!!!! Our AI system is delivering value to our Fortune 500 customers currently, and we intend for that value to increase exponentially. Value to customers. Value to society. Value to nature. -----“Our ultimate goal is an AI that acts as a real-time guardian for the environment—a system that doesn’t just analyze the ‘its’ but actively protects them using the power of ‘bits’.”? - Jed Anderson, CEO, EnviroAI www.enviro.ai (http://www.enviro.ai)
