POST

I'm sometimes not convinced that companies like money" . . .

June 8, 2021

Data. Machine-learning. “There is a general apathy in the environmental sector to using tools that are making companies like Google, Amazon, and Tesla wealthy.”

---“There appears to be a general apathy in the environmental sector to using tools that are making companies like Google, Amazon, and Teslawealthy. It’s odd … very odd … ”

DATA.

MACHINE-LEARNING.

Companies like Tesla, Amazon, and Google invest heavily in machine-learning and data processing. I’m finding it difficult to convince petrochemical companies and the environmental sector about the power of machine-learning and data.

THE OFFER

How about this?

Try EnviroAI for a month. Our team members will help you use it. If it doesn’t identify at least $50,000 in savings and environmental and operational opportunities for your company (depending on your size and environmental

footprint), I will not only give you your money back ($7,500), but I'll write a personal check to whatever charity you wish in the amount of $1,000 if we've agreed to provide you services (limited time offer).

DATA. MACHINE-LEARNING.

MORE ENVIRONMENTAL POWER.

MORE FINANCIAL POWER.
