Facing Limited Resources, States Eye AI To Boost Air, Water Enforcement

March 18, 2021

States are weighing the potential for using artificial intelligence (AI) methods to bolster their air and water enforcement efforts, using new data-collecting techniques to identify potential targets for in-person inspections that will help them maximize the use of increasingly limited staff resources. In a March 16 presentation to the virtual Spring meeting of the Environmental Council of the States (ECOS), law professor Daniel Ho of Stanford University outlined the university's program on AI for environmental compliance, which he called a.
