LIGHT = the universe’s interface

Originally written: September 1, 2025 · Published here: May 13, 2026

LIGHT = the universe’s interface. ? Quantum: wave when observed one way, particle the other. ? Relativistic: the one constant that clocks spacetime. ? Biological: fuel for life, canvas for sight, spark for thought. Maybe deeper than information, Light is the medium of meaning. MacDonald dares: ?God is light? no darkness at all.? If that’s true, curiosity isn’t dangerous’it’s homecoming. ? Deck attached. Add one question, one quote, or one story of light that found you.
