The Environmental Matrix

---“A-C-T-G … it’s code.”

---“Language … it’s code.”

---“Binary … it’s code.”

---“Qubits … it’s code.”

---“The environment is running code. The code creates a beautiful reality, and of course I believe the reality is ‘real’.

The key to protecting the environment is to get this code and information talking together. To use the same fundamental data language so we can better see the interconnections, relationships, and allow for better data transference.”

- Jed Anderson, EnviroAO

---“Nature isn’t classical dammit. And if you want to make a simulation of nature, you’d better make it quantum mechanical.”

- Richard Feynman

Can we create a system where we will no longer need to “dodge environmental bullets”?

YES WE CAN.
