Simulating and Protecting the Environment

ENVIRONMENTAL

REALITY

I tried in the above image to capture our current understanding of reality---both in terms of nature and ourselves: NOVA/PBS/NSF video (http://r20.rs6.net/tn.jsp?f=001qZeuz_Mz6JAFAKyxXIfLwU_uYH2wHh_8kKyp6cN0NqHE8DOMGMnpXJ9wQ46NtsWr2xrQhuFOMA0z-70BmzOUh7bTdL5Ugx7KetKJVVuCaaosUbpMnJ_PBVWHT4ajrmZVGRCX6-_K0Kchii_pFTv3Vw==&c=&ch=). Simulating all aspects of nature with the help of quantum computers/sensors/networks and artificial intelligence will be critical in our efforts to simplify environmental protection.

---"Nature isn't classical, dammit, and if you want to make a simulation of nature, you'd better make it quantum mechanical, and by golly it's a wonderful problem, because it doesn't look so easy."- Richard Feynman

---"Nature isn't classical or just classical. A quantum system is needed to better understand a quantum system. It won't be easy, but it will be simpler.

Building toward a quantum AI environmental protection system one commercialized application at a time. That's EnviroAI." - Jed Anderson
