POST

Not charge people more . . .

May 21, 2021

… charge MORE PEOPLE LESS.” ---- [why we use machine-learning]

- Compliance and Permit Optimization
- Environmental Enforcement
- Legal Review & Opinion Letter Generation
- Environmental Litigation
- Auditing
- Due Diligence

1st & Only

Financial institutions and others are developing machine-learning to improve performance and speed. We are doing the same as environmental attorneys.

Using environmental legal machine-learning.

We want to constantly improve ourselves and our workflows.

Less Billable= More Money for our Clients

This machine-learning system we’ve developed goes against the billable-hour model because we are able to do our work faster with it, but we are confident that delivering faster service with the assistance of machine-learning will pay off in the long run for both our clients and ourselves.

---“Our financial growth plan as a law firm isn’t to charge people more … but charge more people less.”

Jed Anderson, Attorney & Environmental Entrepreneur
