Augmented … Environmental Management Information System … Intelligence

Augmented Environmental Intelligence

Once completed, selecting this button will pull up your facility(s) in EnviroAI … and engage your internal Environmental Management Information System (EMIS) if you wish (either ours, yours, or a 3rd party vendors). Firewalls will remain intact with only one-way transmittal of data (i.e. external data informing internal data). The feature will essentially be plug-and-play.

---"Externally informed EMIS harnessing the power of big data and artificial intelligence. It's taking the external world's digitized environmental intelligence and using it to help make an industrial plant's internal digital systems and human intelligence smarter, more efficient, and more productive." - Jed Anderson, Creator, EnviroAI

ENVIRONMENTALINTELLIGENCE.DATA.POWER. SPEED.
