POST

Pollution . . . gone

April 27, 2021

turning regulatory system “on its head”

Pollution

---“This project removes almost all pollution off-site.”

---“This project re-configures the regulatory playing field.”

—“Instead of continuing to play checkers… . this project plays chess. And the winners are the environment, communities, and industry.”

---“Most major sources become minor.”

---“Lots of regulations disappear … they go with the pollution.”

---“Easier, faster, and cheaper for plants to expand (more PBRs and no offsets—and new emissions also going off-site)

---“Less upsets and no MSS emissions … it’s now someone else’s emissions to deal with.”
