POST

Praise. Praise. Praise . . . and BEWILDERMENT!!!

June 3, 2022

Job's Response in light of Quantum Field Theory

I just get giddy with excitement reading passages like this … Praise. Praise. Praise.

"God doesn't even mention quantum field theory to Job …

- Jed Anderson

Job might have dropped his complaining even sooner if he saw the quantum fluctuations occurring in space-time. It's so bizarre.

PRAISE & BEWILDERMENT

PRAISE & BEWILDERMENT

PRAISE & BEWILDERMENT

"Where were you when I … "

"Who marked off its dimensions … "

“Have you comprehended the vast expanses …”

“Do you know the laws of the heavens? …”

- God to Job (Job 38)

… just 1universe in the Universe?

… “I highly doubt it.”

- Jed Anderson

BIG BANG

PRE-BANG?

POST-BANG?

MULTI-BANG?

OMNI-BANG?

… “To think that our big bang was the only bang would seem at this point to me to be a bit narrow-minded, anthropocentric, andin contradiction to the continual iconoclastic evolution in our cosmological understanding.”

- Jed Anderson, EnviroAI

Just how big is creation? … how may “bangs” ?

The iconoclastic evolution in our cosmological understanding …

- Our Earth is round not flat (this notion of a round earth is contrary to intuition and most of our everyday experience) - 500 B.C. (Pythagorus) [Eratosthenes calculated circumference in 240 B.C. and of course Columbus didn't sail off the edge of the earth when he tried it almost 2000 years later]
- Our Earth isn't the center of the universe[earth rotates around the sun] - 240 B.C. (Aristarchus) [Calculations by Copernicus in 1532 and astronomical observations by Galileo in 1632]
- Our sun isn't the center of the universe[stars are other suns] - 450 B.C. (Anaxagoras) [Bruno in 1584 and then Angelo Secchi proved through spectroscopy in 1860]
- Our galaxy isn't the center of the universe - 964 (Azophi) [Later Kant, Messier, Shapley, and finally Edwin Hubble … January 1, 1925"The day we discovered the universe"]
- Our universe isn't the center of the Universe [or Multiverse]- _____?

How many universes?Interview (https://r20.rs6.net/tn.jsp?f=001N4O4Gy8PWqKIru7KK64OMxkRP-5XACogqzVBqxb_01SI9DiJeqZha3QkhgxIft5qXgW1MfvvWeE164HKt-w8BfetMEGEEf7ky4GEnuqNDyynpn9W30QCVBWanwws_Cur668IKL4cxVMJ7SfxKSs-4w==&c=&ch=) with Steven Weinberg, recently deceased University of Texas Professor and Nobel Prize Winner in Physics.

---"The Universe is full of possibility.The more expansive the range of probability, the more possible of course that everything becomes. Simple math. Bigger range, now you've got a chance since you're in range. Possibility then just becomes the inevitable outcome of probability played out. Once you are in the range … it's gonna happen. AND THIS WE KEEP LEARNING IS SURE ONE EVER-INCREASING 'GINORMOUS' RANGE OF POSSIBILITY. It's incredible!!! Jaw-dropping. Bewildering. Praiseworthy. Joy-evoking."
