POST

Question . . . what else can we build to help protect you?

August 22, 2021

We just completed “Trackbot” this weekend

Question …

what else can we build to help protect you and the planet?

your children?

the animals, plants, and trees in your life?

This weekend we completed coding/ML on the first feature of “TrackBot”. “TrackBot” is an environmental investigation and monitoring tool. This first feature tracks whatever person, company, or subject you tell TrackBot to track in agency filings.
