POST

Talking to nature" . . .

June 1, 2021

increasing the connection speed between humans and the environment---EnviroAI

Astounding.

This will fill you with hope … and make you smile.

---“Humans are increasing the communication speed between themselves and nature …

Human-to-Nature

Communication

---“It’s becoming a much faster information exchange. If you love nature and people like I do, it just makes you smile in the deepest recesses of your being.”- Jed Anderson, Creator, EnviroAI

Humans are communicating with nature to protect it. We write laws for example.

Historically data transfer has been slow. For example, we write laws in English, but it then takes a lot of time and words in English to detail the protection, and then converting these words to bits so that our equipment can understand the English, and then gathering the resulting data back from nature as to the efficacy of the protection efforts (largely in the form of bits as well), and then converting this data back to numbers and to English so we can understand and communicate the results and make adjustments . It’s not fast. And yes it is inefficient. And yes lots gets lost in

translation. And yes we aren't sharing information yet on a data level where nature more fundamentally communicates (i.e. probability, quantum, qubits). But it is and was a start … and a very good start.

---"Protecting nature in English can be difficult."- Jed Anderson

---"Most things in nature don't understand English. And English conveys very little data to nature at very slow speeds."

- Jed Anderson

AND NOW … we're starting to communicate data back and forth between nature and ourselves really, really, really fast.

---"Building a machine-learning environmental protection system with evolving quantum technology to transfer data between humans and nature (https://r20.rs6.net/tn.jsp?f=001wrbph7MeDoRvVQdUp7TOnwA6Ct9JTCHbb2bwVtqAw5btrfDU1PaGIbsj-AqcVAT98c6g6-IvmK1MvTnkNFjIkwnIBUYnLRrqdk1jUJHXkCTQHFQPdOHw4sGdjJq1_-rHfJAPsDnxWHkzEojdb_3Oyw==&c=&ch=) … really, really, really fast---that's EnviroAI.
