POST

Teaching AI

November 14, 2021

Our Customers …

Teaching.

“Parenting”.

Training AI for good.

Our customers are not only profiting from the use of artificial intelligence, but they are helping to train artificial intelligence to do something good in this world …

- To understand why humans protect the environment.
- To value nature and humanity.
- To promote the freedom of human endeavor.

---“AI doesn’t need to be trained to do more bad things in this world. AI needs to be trained to do more good things. Our customers are not only customers … but people who want to leave an indelible mark on the future of environmental protection.”
