“Artificial intelligence!” calls the Once-ler. “We can’t do things the same. The world is changing, we need a new game. Neural networks, remote sensing, and quantum tech … let’s try it over complicated regulations … what the heck.”

“Our future is looking just as bright as can be. Let’s create some new soil for this Truffula Tree. To grow, and to green—Ceres AI will soon provide, more clean air, more thneeds—for everyone world-wide.”

“So let’s jump in there with this environmental AI, will we succeed? 98 and ¾ percent guaranteed!”
