Why so optimistic? … Faith.

—"Why am I so optimistic and enthusiastic about the future of environmental protection? Faith. Faith. Faith. Faith not in ourselves, but in God. What an incredible time to be on this earth with the new tools that are advancing to protecting it. We are entering a human environmental renaissance in an era of artificial intelligence and quantum technologies. We are beginning to augment human environmental problem solving capabilities exponentially. All is well. All will be well. An incredible world we are living into. We will move mountains. Faith."
